

An example of how to do the interior measurements that we will need to begin your project.

- A. Full dimension of interior wall on right, including the section labeled B
 - B. The dimension of the small wall behind the door
 - C. Full dimension of interior wall with window
 - D. The dimension of the window, including any interior trim
 - E. The dimension of the smaller section of wall by main entry door
- And so on.....

- We will not be asking for measurements of windows for window treatments and draperies and will need to set up a measurement trip to obtain those, if doing any window treatments or drapery.
- Include measurements of doors and windows with trim included.
- Use this same method when doing any measurements for elevations (walls).
- Please include locations and dimensions for any columns, odd walls or any items on the walls or floor (and ceiling when appropriate) that will need to be taken into account when we are working on your design.
- If you have any questions about anything that is not listed here please do not hesitate to ask.
